Tussey Mountain Mulch

Aquascape 2/4 Stone Aerator

\$44.98 \$42.73

You Save: 5.00%

Every process that happens in the pond is dependant on oxygen. This is especially important at night when plants are not converting fish-created CO₂ into oxygen. Dissolved oxygen levels are also generally lower in warmer water temperatures. Pond aerators oxygenate your pond, helping create a more stable environment, resulting in healthier fish and plants.

- Promotes a cleaner environment by providing oxygen to beneficial bacteria
- Helps to de-gas CO₂ at night
- Increases dissolved oxygen rates crucial to healthy fish
- Helps circulate pond water
- Can be used in winter to help keep the pond from completely freezing over

Performance Chart

	2-Stone	4-Stone
