Aquablox Water Matrix for the Pondless Waterfall

Small - (26.5" X 16" X 9.5") (17 Gallons)

Large - (26.5" X 16" X 17.5") (32 Gallons)

Aquascape's Aquablox Water Matrix is designed to replace up to 90% of the rock and gravel traditionally used in the reservoir of Pondless Waterfalls applications. The Aquablox Water Matrix can also be used to replace the lower layer of 4-6 inch boulders in the bottom of Snorkel Vault and Centipede Module Wetland filter applications.

- **Over 3 Times more water storage capacity than gravel** - The Aquablox Water matrix can hold approximately 7.4 gallons of water per cubic foot. Gravel can hold approximately 2.2 gallons of water per cubic foot.
- Extra water storage capacity results in less routine maintenance topping reservoir to compensate for evaporation.
- Easier to clean and less prone to clogging than traditional gravel basins.
- **Smaller Reservoirs!** The ability to hold more water per cubic foot allows for smaller reservoirs
